

Life Cycle Cost Analysis Framework and Tool for NJDOT

Our goal is to develop a New Jersey pavement Life Cycle Cost Analysis framework and tool under S862. **(2 Clinic Students)**

Advisors: Dr. Yusuf Mehta

Over the next semester, we will research:

- Review FHWA and State DOT user cost methods
- Assemble NJ resurfacing and cost histories
- Model delay, safety, and pothole claim costs
- Develop the NJDOT LCCA framework and guideline
- Build and pilot the LCCA tool (NPV / EUAC)
- Publish and present the research outcomes
