

PHD POSITIONS

We are currently seeking to hire one to two Ph.D. students in the area of geotechnical engineering, geomechanics, and material characterization, with expertise in experimental testing or computational modeling at Rowan University. The expected start date is September 1, 2024.

Research Fields:

(1) Position 1 focuses on the characterization of geomaterials (e.g., soil, rock) under multi-physics processes. The project involves experimental characterization of damage and cracking in geomaterials, development of constitutive models, and Finite/Discrete Element implementation and modeling. Prior experience in lab testing of geomaterials (e.g., X-ray CT, triaxial testing, bio-mediated tests), or numerical modeling and programming is preferred.

(2) Position 2 focuses on the nondestructive characterization of soil and pavement profiles. This research involves lab-scale determination of material physical properties, and field assessment of non-destructive characterization tools. Prior experience with lab-scale (e.g., mechanical, electrical, thermal testing), field and geophysical testing (e.g., wave-based method, CPT) of soil is preferred.

Requirement for Admission: Bachelor/Master degree in civil engineering, mining engineering, petroleum engineering, engineering geology, geomechanics, applied mechanics or related disciplines. Excellent communication skills, both oral and written.

Work Place: Rowan University is a comprehensive state-designated research institution with approximately 20,000 students. The main campus is located in Glassboro, New Jersey, a suburb of Philadelphia, and within easy driving distance to Washington DC and New York City. Rowan has been recognized as one of the top 100 public universities in the nation by *U.S. News & World Report*.

Application: The Ph.D. students will be co-supervised by Dr. Cheng Zhu and his collaborators at Rowan University and external research institutions. To be considered, please send your CV (with transcripts, publications) to zhuc@rowan.edu. The review of applications will begin immediately and continue until the positions are filled. Please feel free to contact Dr. Zhu for more information.
